

WARNING 30" PROPELLER FAN

Any piece of equipment can be dangerous if not operated properly. **YOU** are responsible for the safe operation of this equipment. The operator must carefully read and follow any warnings, safety signs and instructions provided with or located on the equipment. Do not remove, defeat, deface or render inoperable any of the safety devices or warnings on this equipment. If any safety devices or warnings have been removed, defeated, defaced or rendered inoperable, **DO NOT USE THIS EQUIPMENT!!!**

This 120-volt equipment requires a grounded outlet, do not modify plug.

 **WARNING:** Electrical cords, cables, product cords, and wire assemblies, made with PVC can expose you to chemicals including DEHP, which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information, go to www.P65warnings.ca.gov

IMPORTANT SAFETY RULES TO FOLLOW

1. Always turn the fan off and unplug immediately after using and before cleaning.
2. Always turn this fan off before inserting or removing the plug from the wall outlet.
3. To protect against electrical hazards, do not place in water or other liquids. Do not allow fan to become wet or damp. Do not place fan where it may fall into water.
4. Do not leave fan on when unattended.
5. Do not operate the fan with a damaged or frayed cord or plug.
6. Place fan on flat, level, debris free surface.
7. Never drop or insert any foreign object into any opening.
8. Do not obstruct airflow.
9. Do not place hands inside of wire guard at any time. Stay away from rotating parts; avoid wearing loose jackets, shirts, and ties. Keep hands and feet away from moving parts.
10. Always wear eye protection. Loose debris can be picked up in the air stream and flown in the air.
11. Hearing protection is required. Motor & air noise may exceed safe dB levels.
12. Do not attempt to relocate fan when the unit is plugged in.
13. Keep away from combustible gas. This could cause a danger of fire or explosion.
14. Avoid gaseous area. Do not operate machine in explosive atmospheres in presence of flammable liquids or gases. This motor creates sparks, which could ignite fumes.

OPERATION

STARTING:

1. Ensure fan toggle is switched to the OFF position.
2. Plug fan into power source.
3. Switch toggle to the ON position.

STOPPING:

Stop unit before unplugging from power source.
Make sure toggle switch is set to STOP.

WHEN USING A GENERATOR:

It is imperative that the generator be running at full capacity before plugging in any electric fan. Always verify sufficient generator output before use. Improper voltage supply may damage unit and void warranty.

SINGLE SPEED REQUIREMENTS

Based on 110-120V fan on 20-amp circuit.

Motor HP: 1.5

Starting Amps: 54.6

Starting Watts: 6,300

Runnings Amps: 14.2

Runnings Watts: 2,100

CFM: 13,000

Weight: 133 lbs.

If the person receiving this handout will not be the user of the equipment, forward these instructions to the operator. **IF** there is any doubt as to the operation or safety of the equipment,

DO NOT USE!!! CALL A TOOL SHED IMMEDIATELY!!!

**FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN
INJURY OR DEATH**
